WOOD

Wood is a renewable resource. It is one of the most environmentally friendly materials. While the trees grow they absorb carbon dioxide and produce oxygen. Pine is the most sustainable as it is a fast growing tree. Wood is durable and gives the product a natural look.

BAMBOO AND BAMBOO FIBRE

Bamboo is a type of wood that is especially eco-friendly since it is a natural resource that renews quickly. Bamboo regrows extremely fast, is naturally pest resistant (no pesticides needed), and requires less water to grow than other plants. Bamboo fibre is a versatile material suitable for making both drinking cups and fabrics and is quickly biodegradable.

WHEAT STRAW

Wheat straw is made of the leftover stalks after the wheat grains are harvested. When treated as waste, the stalks are burned, which leads to air pollution. When reclaimed, the stalks are an environmentally friendly material as they come from an extremely efficient, renewable resource in the food chain. Mixing wheat straw with plastic creates a sturdy material that requires far less plastic to make.

CORK

Cork is harvested only from the bark of the cork tree, meaning that the tree itself is not felled for the production of cork products. The tree simply regrows its bark, making cork a material from a highly renewable resource. Cork is both recyclable and biodegradable, meaning there is no polluting waste.

JUTE

The outer stem and skin of the jute plant are used to make jute: a hard-wearing material that is recyclable, biodegradable, and compostable. The jute plant is ready for harvest in as little as 4 to 6 months and has a high crop yield, making it a very efficient resource. It requires no pesticides or fertilization and even enhances soil fertility for future crops.

COTTON

Cotton is a natural and sustainable resource. After harvesting, most of the cotton plant is used, not just for the production of cotton, so there is little waste. On top of that, products made of cotton are biodegradable.

RECYCLED PAPER

The production of paper requires a lot of water, which is considered a strain on the environment. Paper products should not go to waste but be recycled instead, which saves on energy and water consumption, and reduces waste.

STONE PAPER

Stone paper is a new alternative to paper made from wood pulp. It is by definition not real paper, but a paper-like material made from calcium carbonate and polyethylene, which makes it water and tear resistant as added bonuses. The production of stone paper uses no water, unlike the copious amounts of water used for making paper from wood pulp, which is why stone paper is a more ecological alternative.

PLA

PLA is short for Polylactic Acid, a type of polyester, which doesn't sound very "green". But PLA is made from renewable resources like corn starch and sugar cane and it is a quickly biodegradable material

RPET

Recycled PET, or RPET, saves on the use of fossil energy. Production of RPET emits 70% less carbon dioxide and uses 90% less water than polyester. Instead of polluting the oceans, millions of throw-away PET bottles are recycled into new products.

LINEN

Linen is made from flax plant fibres. The flax plant requires little water to grow; only rainwater, no additional irrigation. It takes little energy to process flax and the entire plant is used, leaving no waste. Linen is strong, so it is long-lasting, but the product is also both entirely biodegradable and recyclable.

OTHER RECYCLED MATERIALS

We are constantly seeking new products that incorporate various sustainable materials. Recycled aluminum is an example of this. Its production requires significantly less energy than making new aluminum and minimizes waste.

WRITING & COLOURING

Ballpens, writing sets, fountain pens, pencils, drawing sets, crayons, highlighters and many more.

A NAME THAT WROTE HISTORY: PARKER

History was literally written with a Parker pen. In 1945, General Dwight D. Eisenhower signed with a Parker 51, marking the end of World War II. Parker innovated pens with leak-free technology and quick-drying ink. The iconic stunt of dropping a pen from an airplane, which remained unharmed, proved Parker's durability.

WATERMAN

PARIS

WATERMAN: WHERE ELEGANCE AND INNOVATION COME TOGETHER

Waterman was founded in New York in 1884, but the brand resonated so well with the European market that it relocated to France and never looked back. It is in Europe where Waterman found its style and its success. Waterman describes elegance as “the perfect balance of beauty and innovation”. Because a Waterman pen is not guilty of style over function. While the exterior is designed to be a timeless beauty, the interior is engineered to be a durable tool.

SMOOTH, LEAK-PROOF AND FLUENT WRITING WITH STILOLINEA

The pen is the quintessential promotional giveaway. But it wasn't always like that. In the early 1970's, Stilolinea founder Piero Chicco was one of the first to see the potential of the pen as a tool for brand awareness. As such, a little bit of history was written.
